

# Warm-Up Chapter 2

Michael Brodskiy

Instructor: Mrs. Stansbury

September 2, 2021— Period 1

1. The story of Easter Island provides an example of scientific thought, as older hypothesis and data, in conjunction with newly gathered information, was used to revise a hypothesis. This revised hypothesis answered more questions regarding the ancient Polynesian civilization.
2. The Polynesian culture could have shifted its agricultural production to become more sustainable by slowing down their usage of forest and soil resources.
